

HOW IT WORKS

Dexcom G7 sends glucose numbers to your smartphone* in real time using a small wearable sensor.

It allows you to easily see your numbers and where they're headed so you can make confident decisions about food, activity, and medication.

The best part?

- ✓ **No** painful fingersticks†
- ✓ **No** inconvenient scanning
- ✓ **Alerts you** before you go too low or when you're high
- ✓ **Allows you to share** glucose data with your doctor and loved ones‡,§

†Fingersticks required for diabetes treatment decisions if symptoms or expectations do not match readings.

I can honestly say, without a doubt, that my life is better with my Dexcom G7."

Army Veteran Colonel Gregory Gadson,

BRIEF SAFETY STATEMENT: Failure to use the Dexcom Continuous Glucose Monitoring System and its components according to the instructions for use provided with your device and available at <https://www.dexcom.com/safety-information> and to properly consider all indications, contraindications, warnings, precautions, and cautions in those instructions for use may result in you missing a severe hypoglycemia (low blood glucose) or hyperglycemia (high blood glucose) occurrence and/or making a treatment decision that may result in injury. If your glucose alerts and readings from the Dexcom CGM do not match symptoms, use a blood glucose meter to make diabetes treatment decisions. Seek medical advice and attention when appropriate, including for any medical emergency.
